BRAINSTORM

come up with three different ideas of themes + interactive features

PHASE 0

Idea 1: Chromakopia / Tyler, The Creator

Theme

A website that introduces users to Tyler The Creator and all of his creative endeavours

Interactive JS Feature #1

Clicking on a picture starts to play a song

Interactive JS Feature #2

A Video that begins playing when the website is loaded

Idea 2: Skateboarding / Skate Games

Theme

A website that introduces the user to the world of skateboarding, clips and the music that's often heard when skateboarding

Interactive JS Feature #1

When you click around different skate clips play

Interactive JS Feature #2

Music playing in the background

Idea 3: Music / Different Genres

Theme

There's different music artist from different genres / a website to introduce you to different types of music

Interactive JS Feature #1

When you click on a different artist music plays

Interactive JS Feature #2

Maybe there is a button that just plays a random song from any genre

EVALUATE

think about the good and bad for each idea then choose one

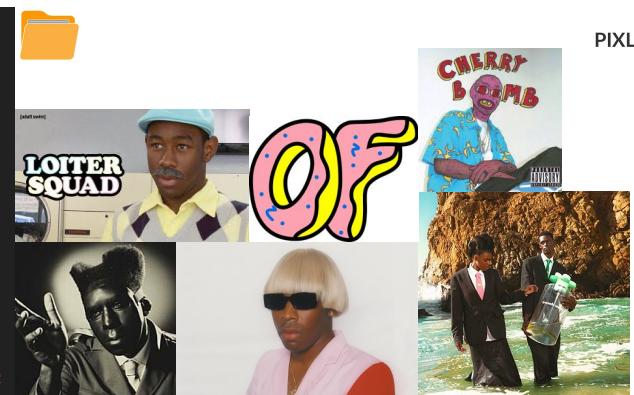

PHASE 1

Pros/Cons of Each Idea:

	Pros	Cons
Idea 1: A Website That Introduces You To Tyler, The Creator	- Could Possibly Be Simple To Code Just Needing Embeds and Some Javascript	- The Organization of how/when certain things will be played
Idea 2: A Website That Introduces You To Skateboarding		- There's A Lot Of Different Routes To Go So There's More Chances To Go Wrong
Idea 3: A Website That Introduces You To Music As A Whole	- This Could Be An Interesting Project In Programming	- Very Broad

CONTENT

gather and edit essential content for your site

PHASE 2

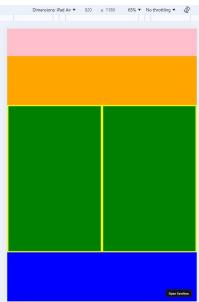

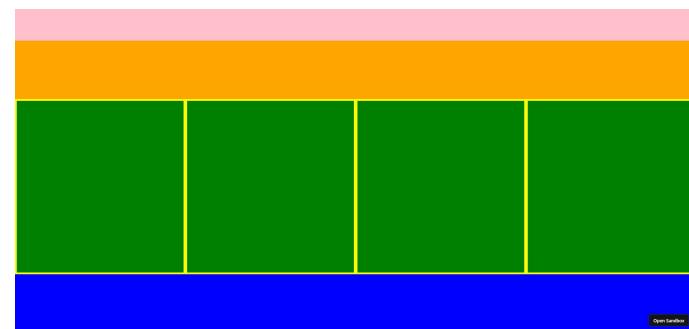

BUILD

create your desktop divs using html and css then make it responsive

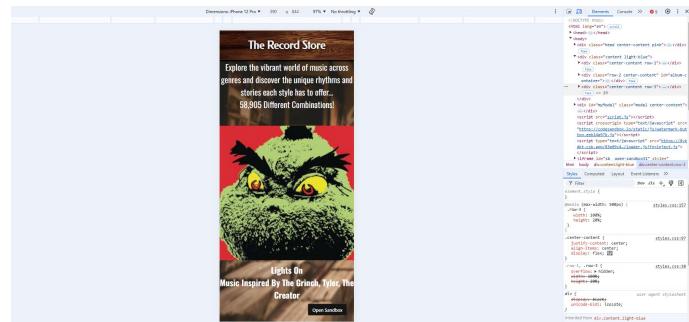

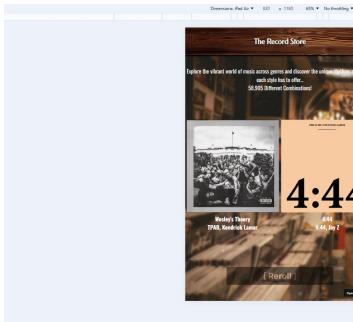

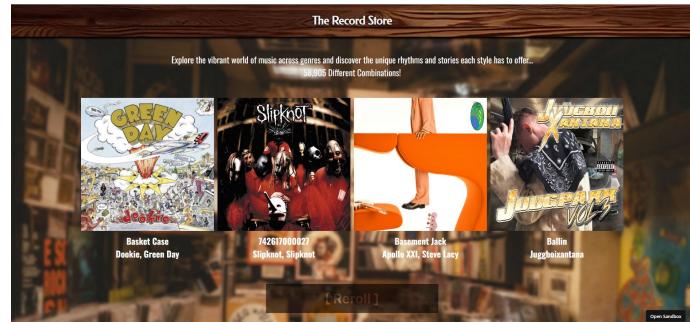

PHASE 6

CONTENT

insert all images and text into your site

PHASE 7

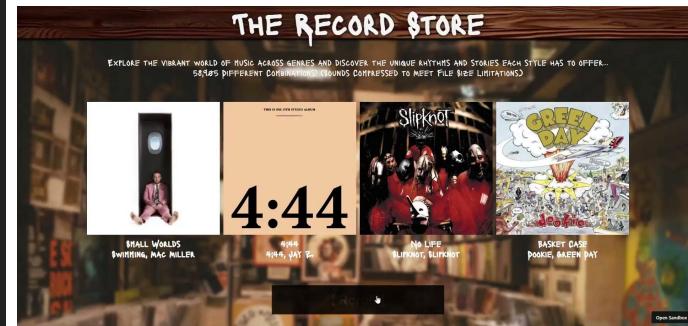

JAVASCRIPT

add behavior to your page by inserting two pieces of javascript

ENHANCE UX

add in effects when the user hovers and clicks to make the page intuitive and fun

Added A Better Hover Effect And The Modal Background More Interactive
